

How to Access Draws through the Sporting Pulse

Website I Framed into the Waikato Basketball Web

1. Hit the competitions tab on default page of website
2. Identify which division /pool your team is playing in. For Mini-ball this information is contained in a PDF document in the competition notices section. For secondary schools this information will be provided by your school.
3. Click on the day the relevant competition is played.
4. Identify the competition required and click on fixtures on the right hand side.
5. This will show you the current draw and any further draws which have been uploaded. Rounds up loaded will be shown above the current draw displayed. (**Round 1 2 3 4 ALL**)
6. Semi-final and final draws are located by going thru the same process as above, but at step 5 you will need to look above the rounds where you should find Normal Competition in Bold and next door Finals matches. (**Normal Competition**/Finals Matches) Click on Finals matches to access semi-finals and finals draws....

Although with any new software there is a period of frustration the FIBA software does allow draws to be generated far more quickly. Aside from Week 1 when draws are often delayed due to time required for data input and the short turn around between the cut off date for registration and the competition starting, draws are out well before 24 hrs before the competition is scheduled so an inability to find them requires a call to WBC to clarify any problems.....

Any problems identified please ph Waikato Basketball
